Dr. Walid Al-Soneidar is a researcher in oral epidemiology, health policy and public health dentistry. He obtained his dental degree in Yemen, earned a master's in health policy at Washington State University as a Fulbright Scholar and trained in epidemiology at the University of North Carolina before completing his PhD at McGill University and a postdoctoral fellowship at the University of Ottawa.

His doctoral research won the IADR/Unilever Hatton Award, and he previously served as North American Director for the IADR Behavioral, Epidemiologic and Health Services Research Group (BEHSR). His current work focuses on epidemiologic methods and the quality of evidence in oral health research and policy.
